

SleepWell Dental Consulting Sessions Featuring ProSomnus

Remote Monitoring in Dental Sleep: The ProSomnus RPMO₂ Canada Launch

ProSomnus RPMO₂ received Health Canada licensing and officially launched in Canada on January 26, 2026.

Join our webinar to hear from Wendy Weisshaar, Country Manager, Canada, ProSomnus Sleep Technologies, as she discusses this unique technology that enables ongoing nightly remote patient monitoring using the first intra-oral buccal oximeter.

Appliance delivery is not the finish line — it's the beginning of patient care.

In this session, SleepWell will outline what effective post-delivery care looks like in a dental sleep program. Including follow-up, monitoring, and ongoing patient support. We'll focus on simple, repeatable workflows that protect outcomes, improve patient experience, and ensure oral appliance therapy is managed as ongoing care, not a one-time event.
