

# Airway & Myofunctional Orthodontics

*Setting the Stage for Healthy Growth and Function*

*Presented By:*

**Dr. Paulo Soares, DDS.**

*Specialist in Orthodontics and Dentofacial Orthopaedics*

## Course Information:

### Date:

Friday, November 6, 2026

### Lecture Time:

8:00am - 5:00pm

*Registration opens at 7:30am*

### Location:

Patterson Dental  
6608 50th St. Edmonton, AB  
*(please use the east entrance)*

**8 CEUs**

## Early Bird Tuition:

*(30 days in advance)*

|       |             |
|-------|-------------|
| \$499 | Doctor      |
| \$299 | Team Member |

## Regular Bird Tuition:

|       |             |
|-------|-------------|
| \$599 | Doctor      |
| \$399 | Team Member |

*Tuition Includes breakfast, lunch, light refreshments and course materials.*

**Dr. Paulo Soares, DDS.**

*Specialist in Orthodontics & Dentofacial Orthopaedics*

Dr. Paulo Soares is an internationally recognized orthodontist with over 20 years of clinical experience, specializing in Myofunctional & Airway Orthodontics and Dental Sleep Medicine. His approach emphasizes prevention and multidisciplinary collaboration to support healthy craniofacial development and overall wellness in children.

A passionate educator and innovator, Dr. Soares pioneered Brazil's first Mini-Residency in Myofunctional Orthodontics and has trained more than 1,200 dentists and healthcare professionals through in-person and online programs. He is a frequent speaker at national and international conferences, sharing practical strategies for early diagnosis and interceptive treatment.

Today, Dr. Soares brings his expertise to Canada as Founder of Airway Ortho Academy, where he mentors dental teams on implementing streamlined, airway-focused systems of care. His programs integrate orthodontics, craniofacial growth guidance, and treatments for TMD and Sleep-Disordered Breathing, helping clinicians deliver predictable outcomes and prevent complex issues later in life.

## Course Overview:

This engaging course is designed to provide clinicians with essential, practical insights into the relationship between airway health, functional habits, and craniofacial development in children.

The program centers on early diagnosis and interceptive treatment and features real-world case studies to illustrate concepts—no hands-on component is included.

Emphasis is placed on implementing an efficient, streamlined system that enables practitioners to identify the root causes of malocclusion early and deliver targeted interventions, ensuring more consistent and predictable results for patients and helping to prevent complex issues later on.

## Foundations, Diagnosis & Pediatric Treatment

This introductory course equips clinicians with essential tools for early diagnosis and interceptive treatment in children. your new text

### Morning Session:

**The Why:** Explore the critical link between airway health, tongue posture, and craniofacial growth. Understand how mouth breathing and poor habits lead to malocclusions.

**The How:** Learn practical chairside screening techniques, visual indicators, and structured protocols for comprehensive airway and myofunctional assessment.

### Afternoon Session:

**Palatal Expansion:** Discover how orthopedic correction creates space, improves nasal airflow, and supports proper tongue positioning.

**Myofunctional Appliances:** Gain insight into AMCOP Bioactivators and how they guide arch development, promote facial growth, and correct oral habits.
